

NATURE'S SUNSHINE®

ZAMBROZA, Certifiably the Best!

Zambroza is a delicious antioxidant-rich fruit drink, super-charged with ten nutritious fruits and herbal extracts. Each ingredient was specifically chosen for its remarkable health benefits, making Zambroza the most powerful antioxidant drink on the market with truly exceptional holistic properties.

This special formula is loaded with potent antioxidants that scavenge free radicals from the body, a robust array of bioflavonoids that aid in the body's immune defence and a range of active plant compounds, called xanthones, that support the immune, digestive, cardiovascular and structural systems.

But when you look around the market, you'll find a host of products all claiming to provide the similar benefits. So what separates Nature's Sunshine's Zambroza from the rest? In a word, '**QUALITY**'. We guarantee the best, most potent, most effective formula available. And now, you don't need to take our word for it.

**Nature's Sunshine Zambroza is certifiably
the pre-eminent antioxidant drink on the market**

Brunswick Laboratories, a leading, independent commercial laboratory specialising in the science of antioxidants and oxidative stress has recently given Zambroza its seal of approval, certifying that each bottle of Zambroza will deliver unparalleled antioxidant protection.

**Recent test results from Brunswick Laboratories demonstrate
Nature's Sunshine's Zambroza have a
very high ORAC: 57,623 μ mole TE/L (trolox equivalents/litre), and
a very high HORAC: 11,078 μ mole CAE/L (caffeic acid equivalents/litre).**

As certified by Brunswick Laboratories, Zambroza is the world's premier antioxidant drink, combining a variety of natural ingredients that synergistically provide health benefits many times greater than the individual benefits of each ingredient. These powerful ingredients help neutralise free radicals and reduce the risk of numerous diseases.

To maintain this illustrious certification, Brunswick will continue to test each lot of Zambroza to ensure exceptional, consistent quality.

Zambroza can be taken by people of all ages, and it's safe to take during pregnancy. It contains no artificial colours, sweeteners or flavourings.

Available exclusively from Nature's Sunshine products, Zambroza is the world's only functional beverage certified for consistent antioxidant quality.

NATURE'S SUNSHINE®

Nature's Sunshine are proud to announce that New Brunswick Laboratories; a third party independent laboratory that specialises in antioxidant testing; has recently awarded Zambroza a new and prestigious certification.

Founded over a decade ago, Brunswick Laboratories is recognised internationally by leading health research institutions and the nutraceutical, pharmaceutical, and food and cosmetic industries for its ground-breaking advancements in antioxidant science.

A certification seal is only as good as the organisation that backs it

Before granting its seal of approval, Brunswick Laboratories performs a battery of tests to examine five key elements of Zambroza; ORAC, HORAC, phenolics, bioflavonoids and xanthones.

1. **ORAC** (Oxygen Radical Absorbance Capacity) is a measure of the total antioxidant power of Zambroza.
2. **HORAC** (Hydroxyl Radical Averting Capacity) measures Zambroza's ability to avert, or prevent, the formation of hydroxyl radicals, some of the most damaging free radicals in the body.
3. **Phenolics** are plant substances possessing antioxidant activity.
4. **Bioflavonoids** exhibit antioxidant activity and increase the body's biological response to free radicals.
5. **Xanthones** are biologically active plant compounds that support the immune, structural, cardiovascular and digestive systems.

To maintain this illustrious certification, Brunswick will continue to test each lot of Zambroza to ensure exceptional, consistent quality.

Zambroza is made from the valued and exotic-tasting mangosteen and wolfberry fruits from the orient, which have been combined with the additional antioxidant power of red and concord grapes, raspberry, blueberry, grape seed and grape skin, applephenon and decaffeinated green tea extract. These powerful ingredients help neutralise free radicals and reduce the risk of numerous diseases.

Zambroza can be taken by people of all ages, and it's safe to take during pregnancy. It contains no artificial colours, sweeteners or flavourings.

Zambroza is available exclusively from Nature's Sunshine products, Zambroza is the world's only functional beverage certified for consistent antioxidant quality.
